Your Trusted Partner in Custom Metal Manufacturing

Shanghai Fyyna Machinery Tech Ltd. is a premier metal products company based in Shanghai, China. With ISO 9001:2015 certification and over 15 years of hands-on experience, we specialize in producing high-quality custom metal parts for customers in the US and China.

We provide resources and expertise in custom metal parts that reduce your direct and overhead costs. Our dedicated Manufacturing Operation can transform your unique concept into a finished part — manufacturing to your specifications, drawings, or world standards.

At Fyyna, we don't stand for standing still. By listening to and collaborating with customers, we gain an understanding of their daily challenges, and take action to improve their products and productivity.

Shanghai Facility

Full-service production facility

Global Supply

15+ years exporting to USA

Custom Solutions

From prototype to mass production

Quality Control

ISO 9001:2015 certified

10 Manufacturing Processes

One Trusted Partner

01

Die Casting

Aluminum, zinc, magnesium
die casting

02

Investment Casting

Precision lost-wax
casting process

03

Sand Casting

Cost-effective large
part casting

04

CNC Machining

3, 4, 5-axis precision
machining

05

Stamping

Progressive & transfer
die stamping

06

Forging

Hot & cold forging
for strength

07

Tube Bending

CNC precision tube
bending

08

Spinning

Metal spinning for
hollow parts

09

Fabrication

Welding & assembly
solutions

10

Custom Fittings

Bespoke hydraulic &
pneumatic fittings

Casting Solutions

Die Casting · Investment Casting · Sand Casting

Die Casting

Aluminum, zinc, and magnesium die casting for complex geometries with excellent surface finish. Ideal for automotive, hydraulic, and electrical housings.

Investment Casting

Precision lost-wax casting for intricate parts in stainless steel, carbon steel, and alloys. Used in aerospace, marine, and valve applications.

Sand Casting

Cost-effective solution for large and heavy parts in iron, steel, and non-ferrous metals. Suited for shipbuilding and heavy equipment.

Forming Solutions

Stamping · Forging · Spinning

Stamping

Progressive and transfer die stamping for high-volume sheet metal components. Precision holes, bends, and complex profiles.

Forging

Hot and cold forging for superior strength and grain structure. Critical fasteners, shafts, and connecting components.

Spinning

Metal spinning for symmetrical hollow parts with excellent concentricity. HVAC, containers, and lighting components.

Machining & Tube

CNC Machining · Tube Bending · Fabrication

CNC Machining

High-precision 3, 4, and 5-axis machining. Bearing rings, shafts, and complex profiles with tight tolerances.

Tube Bending

Precision CNC tube bending for hydraulic lines, exhaust systems, and structural components.

Fabrication

Welding, assembly, and custom fabrication for complete sub-assemblies. Pipe elbows, manifolds, and frames.

Custom Solutions

Fittings · Flanges · Connectors

Custom Fittings

Bespoke hydraulic and pneumatic fittings in various materials. Threaded, flanged, and compression types.

Flanges

Custom flanges to ANSI, DIN, and JIS standards. Weld neck, slip-on, blind, and socket weld types.

Tube Assemblies

Complete pre-assembled tube systems with fittings. Tested and ready for installation.

INDUSTRIES SERVED

QUALITY ASSURANCE

Trusted Across Critical Sectors

Hydraulics

Tubes, fittings, flanges & elbows

Automotive

Engine, chassis & exhaust parts

Marine

Corrosion-resistant components

Oil & Gas

High-pressure fittings & valves

Construction

Structural & heavy-duty parts

Industrial Equipment

OEM metal components

ISO 9001:2015 Certified

01

Incoming Material Inspection

Raw materials verified against certifications.

02

In-Process Quality Control

Real-time monitoring with SPC tools.

03

Final Inspection & Testing

Dimensional verification and performance testing.

04

Pre-Shipment Audit

Independent quality audit before shipment.

ISO 9001:2015

Quality Management System Certified
